ABOUT US

Established in 1979, Delemar Aluminium has grown to become a key player in Egypt's aluminium industry. Specializing in aluminium profile extrusion, the company delivers high-quality products that meet international standards and serve a wide range of sectors.

With decades of experience, Delemar Aluminium has built a strong reputation for reliability, precision, and innovation. Our advanced production capabilities and commitment to excellence have positioned us as a trusted partner in both local and regional markets.

Today, Delemar Aluminium continues to expand its footprint, enhancing its manufacturing capacity and reinforcing its position as a leading aluminium solutions provider in Egypt and the Middle East.

OUR VISION

To be the leading aluminium extrusion company in the region, recognized for delivering superior quality products, innovative solutions, and exceptional customer satisfaction, while maintaining competitive pricing.

OUR MISSION

Our mission is to manufacture high-quality aluminium profiles that meet evolving market demands through advanced technology, operational excellence, and a customer-centric approach.

We are committed to building long-term partnerships, ensuring consistent product quality, and continuously improving our processes to deliver value to our clients.

Our strategic objective is to serve our clients, distributors, and community by:

**Our strategic objective is to strengthen our position
in the aluminium market by:**

Enhancing production efficiency and product quality
Expanding our aluminium extrusion capabilities
Investing in advanced technologies and sustainable
practices
Meeting customer needs with flexibility and speed
Growing our presence in both local and
export markets

85,000

TONS OF ALUMINIUM PROFILE PER YEAR

AT DELEMAR FOR ALUMINIUM PROFILES PRODUCTION

WE SPECIALISE IN :

MANUFACTURING

A DIVERSE RANGE OF STANDARD PROFILES, INCLUDING ANGLES, BARS, TUBES, SQUARES, RECTANGLES FLATS, AND MORE.

DELEMAR FOR ALUMINIUM PROFILES PRODUCTION

Delemar has positioned itself as the preferred supplier of Aluminium solutions in the MENA region, Europe, and the USA, offering innovative and advanced solutions characterised by the highest quality competitive pricing, and exceptional sales experience.

PRODUCTION CAPACITY

Our current annual production capacity stands at 85,000 tons of aluminium profiles across our five factories. Forty percent of our production caters to the local market, while the remaining sixty percent is exported to clients in the MENA region, Europe, and the USA, owing to our compliance with international standards and quality certifications

PRODUCTION FACILITIES

Aluminium extrusion involves shaping aluminium alloy by forcing it through a die with a specific cross - sectional profile. This process enhances fabrication assembly , improves strength and stiffness and yields lightweight, corrosion-resistant profiles with excellent thermal and electrical conductivity. Most extruded aluminium alloys are lightweight, corrosion-resistant. Aluminium extrusion is a process in which aluminium is heated until it becomes soft and pliable and then forced through a shaped opening in a die to create a specific cross- sectional profile.

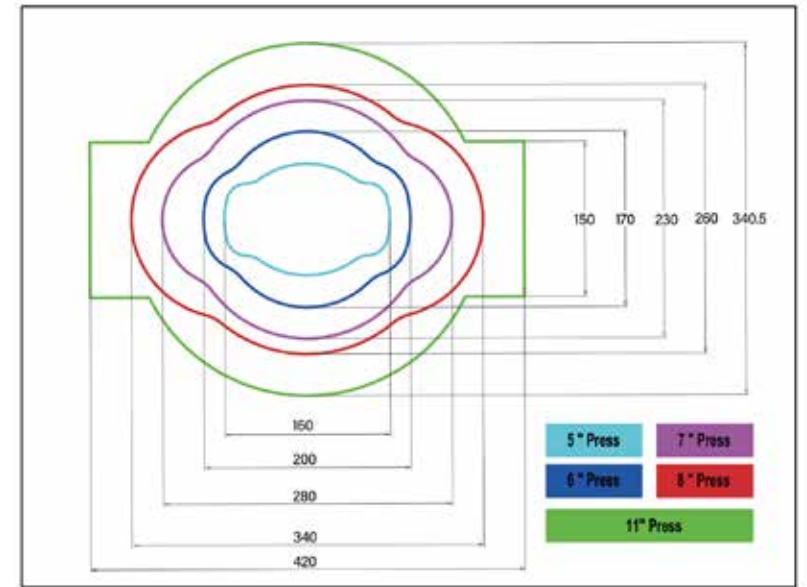

The aluminium is then cooled and solidified in its new shape. Usually, the die's opening can be modified to create different shapes and sizes to meet a user's specific needs. This process enables Aluminium extrusion manufacturers to produce long lengths of aluminium profiles ranging from basic tubes or bars to aluminium profiles ranging from basic tubes or bars to extremely complex designs. Extruded aluminium finds applications in various industries, including automotive, construction, and furniture, due to its durability, lightweight nature, corrosion resistance, and recyclability.

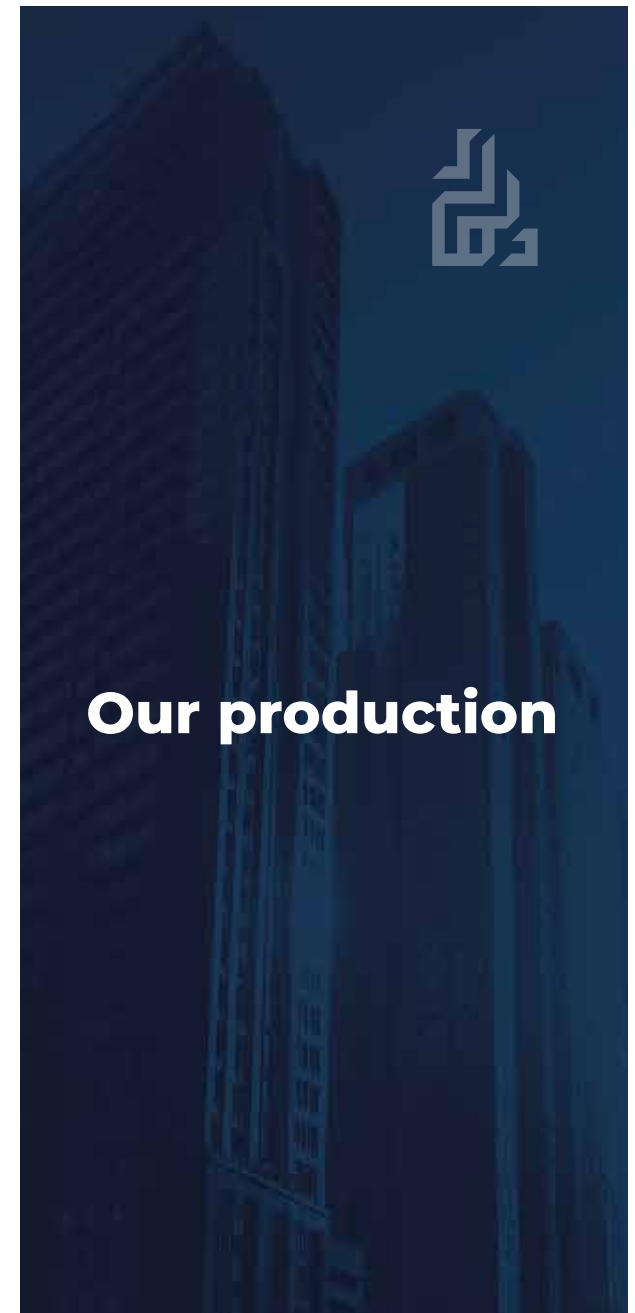

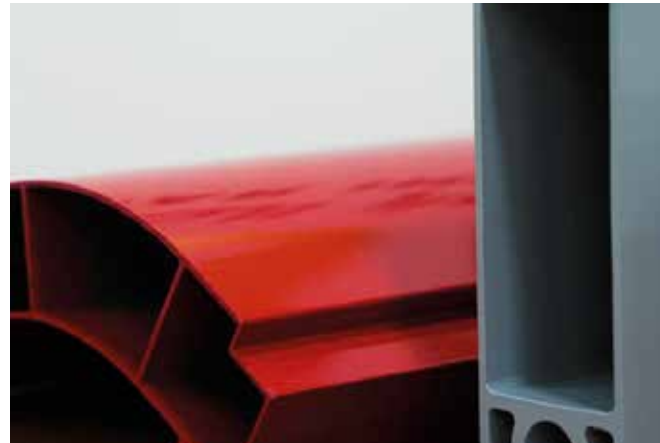

PRODUCTION CAPABILITIES

The maximum sizes can vary depending on the alloy, material thickness, complexity and tolerances. Please contact us for defined limits.

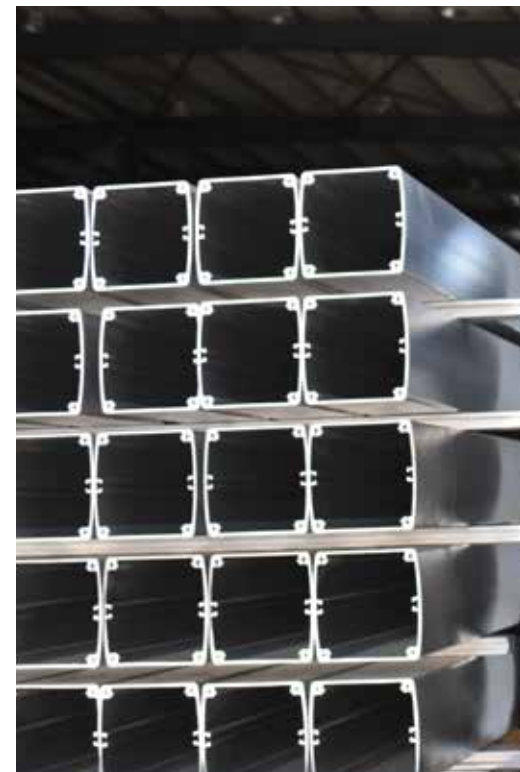

PRESS SIZE	NO.OF PRESSES	CAPACITY / ANNUALLY (TONES)
5 " PRESS	2	7200
6 " PRESS	1	5000
7 " PRESS	6	36.000
8 " PRESS	2	20.000
11" PRESS	1	18.000

Our production

Our production

PACKING DEPARTMENT

We adhere to global standards in our packing processes, providing Five packaging **options**:

- **Spiral Packaging**
- **Carton**
- **Shrink Film**
- **Protective Tape**
- **Foam**

QUALITY STANDARD

We adhere to applicable international standards such as EN, DIN, ASTM, and others to ensure the highest quality of our products.

QUALITY CONTROL DEPARTMENT

Quality tests are conducted at regular intervals during and after production to guarantee flawless end products. To uphold our commitment to quality, we utilise Engview quality testing machines for dimensional measurement and surface inspection. This system, developed and manufactured by Engview, enables us to enhance quality, reduce scrap rates, cut costs, and boost productivity cementing our position as one of the top, aluminium manufacturers in Egypt.

SUSTAINABILITY

OUR APPROACH

We integrate sustainability into every stage of our production, from raw materials to finished products, ensuring that our processes align with international environmental standards and best practices. Our approach focuses on three key pillars:

1. RESPONSIBLE SOURCING & CIRCULAR ECONOMY

We prioritize the use of recyclable and sustainable materials in our aluminum reducing waste and maximizing resource efficiency. Our aluminum profiles are designed for longevity, reusability, and recyclability contributing to a more circular economy. By collaborating with local and international suppliers who share our sustainability values, we ensure ethical and responsible sourcing.

2. ENERGY EFFICIENCY & CARBON REDUCTION

We continuously invest in energy-efficient production technologies including advanced coating and extrusion processes that lower emissions. Our facilities optimize energy consumption, incorporating solar energy and modern insulation techniques to reduce our carbon footprint. Through process innovation, we aim to reduce industrial waste, water usage, and CO₂ emissions, aligning with global sustainability goals.

OUR COMMITMENT TO SUSTAINABILITY

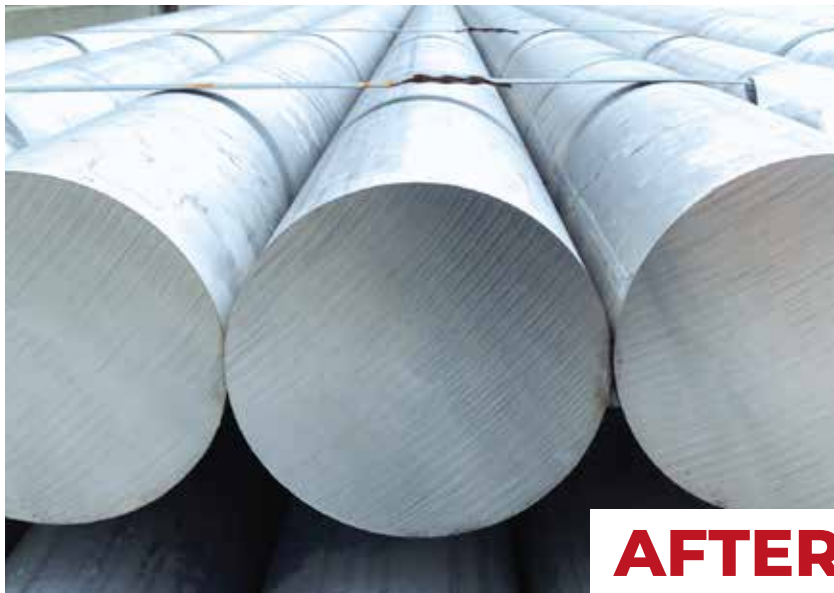

At Delemar Industrial Group, we believe that sustainability is not just a responsibility but a driving force for innovation and long-term success. As a leader in Egypt's aluminum industry, we are committed to minimizing our environmental impact while delivering high-quality, sustainable solutions to our customers worldwide.

3. SUSTAINABLE INNOVATION & GREEN BUILDING SOLUTIONS

Delemar provides eco- friendly aluminum and glass solutions that enhance energy efficiency in buildings and infrastructure projects. Our processed glass and coated aluminum contribute to sustainable architecture by improving thermal performance and reducing energy costs. We actively support green building certifications such as LEED and BREEAM by supplying environmentally friendly materials for global projects.

OUR FUTURE VISION

Sustainability is an on going journey, and we are committed to further enhancing our environmental and social impact.

AFTER

BEFORE

OUR FUTURE GOALS INCLUDE:

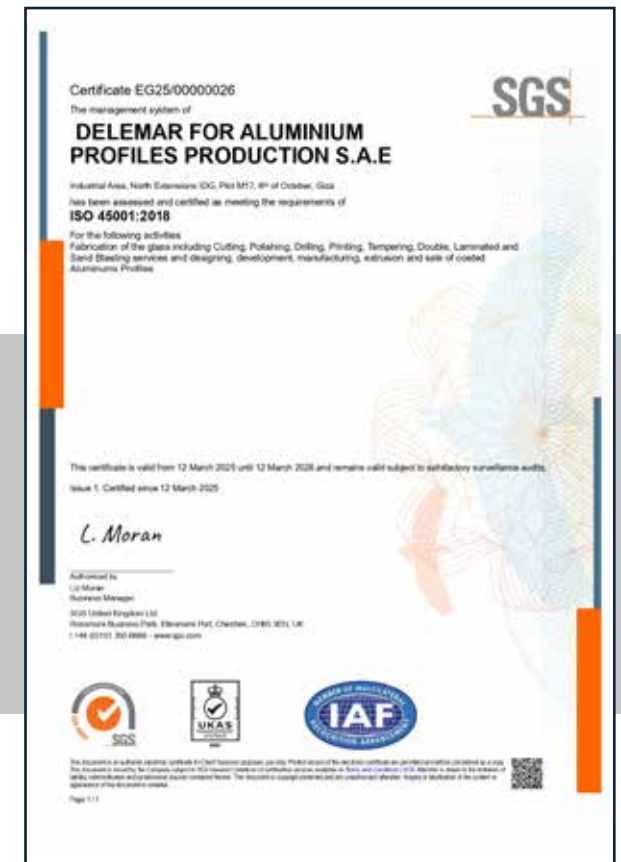

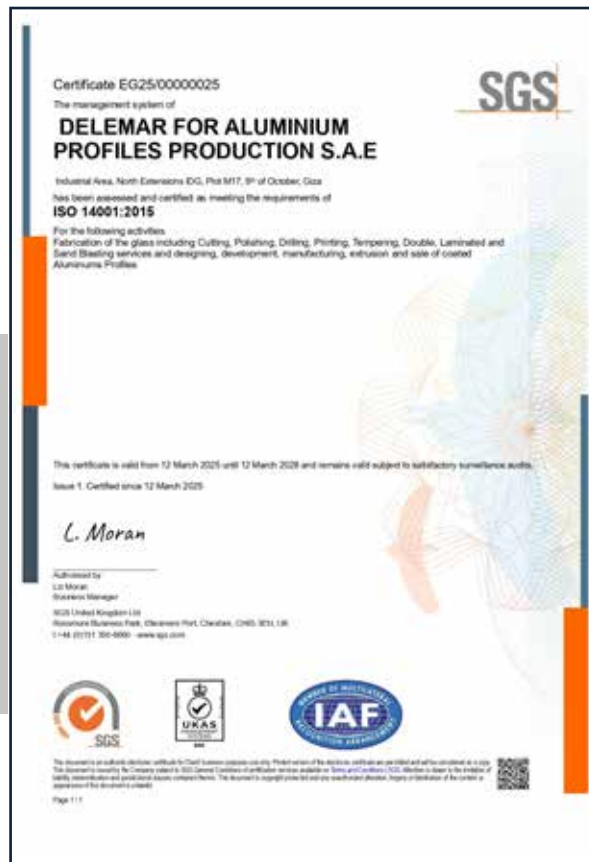

Expanding the use of low-carbon and recycled aluminum in our production. Strengthening our waste management and water conservation initiatives. Partnering with research institutions to develop new sustainable solutions for the industry. Insulation techniques to reduce our carbon footprint. Through process innovation, we aim to reduce industrial waste, water usage, and CO₂ emissions, aligning with global sustainability goals.
